

```

1 /Library/Frameworks/Python.framework/Versions/3.9/
  bin/python3.9 "/Users/timkong/Main Storge/编程/
  homework/Central Limit Theorem.py"
2 The average result of rolling dices 100 times is 3.
  526689913247621.
3 The standard deviation in this rolling dice
  experiment is 1.7144249980071007, which means 68%
  of dice results are amidst the range of 1.
  8122649152405201~5.241114911254721, 95% of dice
  results are amidst 0.09783991723341945~6.
  955539909261822.
4 The standard deviation in the average of all
  rolling dice experiments is 0.036892083004152566
5 The Z score for  $z = 0.5$  is 66.03999999999999%
